

TECHNICAL CARD

# ALGAE PASTE

Algae Paste is a high quality Chlorella paste, developed specially for rotifer feed/Green water Technique. The product contains pure Chlorella cells (*Chlorella* sp.).

These algae are known to have a very high content of active enzymes,

vitamins and minerals, all concentrated in a size similar to a human erythrocyte (2 to 8µ diameter).

Being produced in EU improves Logistics and freshness being delivered to the customer a few days after its production.

NUTRIENT	VALUE	NUTRIENT	VALUE
Dry Matter (%)	18	Vitamin A (mg)	0.6 ± 0.5
Protein (g)	8.5 ± 1	Vitamin B Caroten (mg)	3.73 ± 0.5
Lipids (g)	2.0 ± 0.5	Vitamin B3 (mg)	2.20 ± 0.5
Fiber (g)	3.81 ± 0.5	Vitamin E (mg)	4.33
w6 (%)	5.8	w3 (%)	31.4

## INGREDIENTS

100% *Chlorellasp.*

## CHARACTERISTIC OF ALGAE PASTE

**Production and freshness:** Chlorella cells are produced by demand. 3 to 5 days-old algae cells will be delivered to the customers, ensuring top freshness.

**Concentration:** Algae Paste is a highly concentrated (minimum 18%) from of pure Chlorella cells. This is due to highly technological centrifugation process, ensuring 20% more algae cells present in the water.

**Logistics:** Due to its EU manufacture site, it will avoid heavily burocratic processes of Customs, being shipped from door to door.

**Clean:** When compared with similar products in the market, it contains fewer Bacteria.

## STORAGE CONDITIONS

Store in cooled place  
between 2°C to 6°C  
without freezing the product

## INSTRUCTION FOR USE

Please use it within 30 days of  
production date.

Adjust quantities according with  
normal and local procedures.

## PACKAGING

Cubitainer of 20 liters
