

TECHNICAL CARD  
**NURSea**

NURSea is a nursery feed with dedicated formula for marine fish cultured in intensive conditions where nutrition and water quality are crucial parameters to ensure a healthy growth of juveniles.

Nursea is produced by an innovative technology of micro-cold extrusion and guarantee a high water stability. It is also a functional feed that will protect the animals during stress conditions (Life Defense concept).

- Micro-cold extrusion
- Preventing denaturation of essential nutrients
- Homogeneous particle size facilitating the consumption by the fish
- Lower leaching preserving the water quality in the nursery tanks
- High stability in water
- High palatability
